

**w** codeweekend

# Build something. Together.

A welcoming identity for a community  
of developers, learners and mentors.

THE SELECTED DIRECTION  
Weekend W

# A mark that belongs in the everyday.

01 / EXPLORATION

## CW Monogram

A connected monogram with a human, informal feel.

The letterforms can be mistaken for “aw”.

02 / SELECTED

## Weekend W

Two joined channels form one confident, compact W.

Selected: clearest silhouette and strongest small-size use.

03 / EXPLORATION

## Shared Blocks

A modular staircase suggests learning and progress.

The chart-like silhouette feels less specific to the community.

Design judgement based on clarity, versatility and fit. Concept images are explorations; the supplied SVG files are the final masters.

# One W. Built together.

An open, sturdy symbol with the warmth of rounded joins.

Two equal channels share a central stem: a quiet idea of learning together.

PRIMARY / CREAM OR WHITE

REVERSE / INK

## Works in one colour

Use the mono master for stamps, embroidery and single-ink printing.

## Give it breathing room

Leave one stem-width of clear space around the visible logo on every side.

## Keep the small mark simple

Use the supplied favicon at 16–32 px.  
Use the full lockup from 160 px wide.

# Warmth, with room to breathe.

## Cream

#F7F4EC

The canvas. Give it the most space.

## Ink

#182B29

Text, wordmark and dark surfaces.

## Vermilion

#F0643B

Logo and graphic emphasis.  
Use Ink lettering.

## Rust

#CC3A10

Primary buttons with white text.

## Sage / #BCC9BC

A quiet supporting colour. Use in separate compositions.

### Choose a colour family per composition.

Ink + Cream + Vermilion for energy. Ink + Cream + Sage for quieter stories.  
Avoid equal Ink, Vermilion and Sage stripes; do not arrange them as a tricolour.

Vermilion on Cream is 2.90:1. Keep that pair out of text and functional icons. The logo is artwork; navigation labels still need accessible text.

# Every state has a job.

Email address

Error: enter a valid email address.

Use text or an icon with every status. Colour alone is never the message.

| Role              | Text or edge / surface | Contrast |
|-------------------|------------------------|----------|
| Body              | #182B29 / #F7F4EC      | 13.49:1  |
| Accent button     | #182B29 / #F0643B      | 4.65:1   |
| Primary button    | #FFFFFF / #CC3A10      | 5.02:1   |
| Link on surface 2 | #A72D0B / #EDE9DF      | 5.73:1   |
| Input border      | #687B71 / #EDE9DF      | 3.72:1   |
| Error             | #B3261E / #FFF0EE      | 5.90:1   |

Normal text ≥ 4.5:1. Control edges and focus against their adjacent surface ≥ 3:1. These pairings pass; a website still needs an end-to-end accessibility check.

| Links                           | Surfaces & boundaries             | Focus & feedback                   |
|---------------------------------|-----------------------------------|------------------------------------|
| Rust Dark #A72D0B, underlined.  | Cream; secondary #EDE9DF.         | 3 px outline with 3 px offset.     |
| Hover #822308. On Ink: #FA805E. | Inputs #687B71; dividers #D9DED7. | Rust Dark on light; Cream on dark. |

Rust #CC3A10 passes on Cream (4.57:1), but fails on the secondary surface (4.14:1). Use Rust Dark for links on both. All status pairs are defined in tokens.css.

# One voice. Both directions.

LATIN / MANROPE

## Build something. Together.

Headings 800. Body 400–500.  
Web body 18 px / 1.6. Use sentence case.

ATKINSON HYPERLEGIBLE MONO / 500

### WEEKEND 01 / BUILD & SHARE

Short technical labels and code.  
Use Vazirmatn for Arabic-script labels.

DARI & PASHTO / VAZIRMATN

دری  
پښتو

ټ څ څ ډ ډ ږ ښ ګ ڼ ې ۍ

Retain the site's Vazirmatn. Body 18 px / 1.8.  
No artificial letter spacing. Natural RTL alignment.

#### Set language and direction

Use lang="fa-AF" or "ps-AF" and dir="rtl" on the relevant page or section.

#### Keep the identity LTR

Isolate the supplied logo with dir="ltr". Do not mirror the W, wordmark or code.

#### Review native copy

These are script specimens, not translated campaign copy. Have native speakers review published text.

# Show the energy of making.

Hero artwork / 1600 × 1000. Square crop also supplied.  
Set page headlines beside the artwork in live HTML.

## Geometry carries the story.

Use large, upright W forms with deliberate crops and clear space. Flat colour, an 8 px layout grid and one accent family per composition.

## Privacy is part of the direction.

Use these abstract tiles as defaults. Future story images can show sanitised project screens or objects; remove faces, names, account details and identifying surroundings.

## Keep the content honest.

Do not invent learner projects or imply an abstract image documents a real event. Avoid cultural motifs and rescue narratives.

## Build / learn / share

1200 × 900 story tiles.  
Titles belong in HTML.  
Decorative images: alt="".

Patterns are supporting artwork, never substitute logos. Keep busy patterns away from body text. Meaningful project images need alt text describing the work, not the learner's identity.

# Invite people to build.

POSITIONING

**An inclusive community  
of developers.**

SIGNATURE LINE

**Build something. Together.**

HOW WE SOUND

Warm, specific and practical. Speak to learners as people who make things. Show the work and give a clear next step.

**Use:** learn, build, practise, share, join.

**Avoid:** hype, jargon and rescue narratives.

**Name:** CodeWeekend in prose.

Lowercase only in the logo.

# The files behind the identity.

## Logo masters

Horizontal and stacked SVGs.  
Colour, reverse and mono masters.  
Transparent PNGs, avatar and favicon.

## Web foundations

Semantic colour tokens and sample CSS.  
Manrope, Atkinson Hyperlegible Mono  
and Vazirmatn, with licences.

## Imagery & communication

Hero in landscape and square formats.  
Three story tiles; two pattern families.  
Square, portrait and banner social artwork.

## Preliminary name and visual screen

Canadian register: 0 matches for CODEWEEKEND and “CODE WEEKEND” on 9 October 2026. Unrelated events using Code Weekend were found elsewhere. Orange W marks also exist, notably Wattpad. This is not trademark clearance.

Before a major print run, obtain a professional name and design review in the intended markets. Research scope, sources and limitations are in research/brand-screening.txt.

The website has not been changed. This package supplies the design rules and assets for its next implementation. SVGs are the vector masters; PNGs are digital exports.

DECISION / KEEP THE APPROVED W

## The simple form holds up.

The tested cursor notch is under one pixel wide at favicon scale and loses its intended meaning. Keep the original geometry and use the full CodeWeekend lockup where space allows.

A consistent wordmark, palette and layout do more here than a fragile extra detail.
